WHY SHOULD FIRE PROTECTION BE **A TOP PRIORITY IN MY COMPANY?**

The safety and security of your employees, customers and company assets are the reasons for making fire protection a top priority in your company. Without a quality fire protection program, you may be putting the future of your company at risk.

WHY DO I HAVE TO **HAVE MY EQUIPMENT SERVICED?**

State building and fire codes require building owners to install and maintain fire protection equipment. Also, insurance carriers require that fire protection equipment be serviced by trained and licensed individuals in order to qualify for insurance coverage. The codes provide a time table for when fire protection equipment must be inspected and serviced.
